2021 Founder's Award for Creative Design Scoring
Total: 100pts

In recognition of BEST founders Steve Marum and Ted Mahler.
Creative Design = "competitive advantage or enhanced functionality by a unique or disruptive approach."

The judges will identify the machines that have a very unique or totally different way to perform functions needed to accomplish the game tasks and that aids them in being competitive. This could be hardware, software, or both working together. A machine's unique approach shall be seen as "creative" or "out of the box" - not just different. The idea(s) must have merit. The machines shall be competitive in the game (score) as the supporting evidence that their unique approach has merit. This is creativity in design of functionality and not about a machine's paint job or bling.

If desired, use a 100-pt scale to aid your assessment.   Add notes when applicable to aid your assessment.
